                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                           Sequence 1, Application US/08930921B

Patent No. 6287837

GRUERAL INPORMATION

APPLICANT: BENUDOIN, Adrien R.

APPLICANT: SEVIGNY, Jean

TITLE OF INVENTION: ATP-DIPHOSPHOHYDROLASES, PRODUCING THEI

TITLE OF INVENTION: TECHNOLOGY

TITLE OF INVENTION: TECHNOLOGY

FILE REFERENCE: ATP-DIPHOSPHOHYDROLASES-BEAUDOIN

CURRENT APPLICATION NUMBER: US/08/930,921B

CURRENT FILING DATE: 1998-01-02

BARLIER APPLICATION NUMBER: PCT/CA96/00223

EARLIER APPLICATION NUMBER: PCT/CA96/00223

SAFLING DATE: 1996-04-10

NUMBER OF SEQ ID NOS: 8

SOFTWARE: PatentIn Ver. 2.0
                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                            Query Match 100.0%; Score 2698; DB 3; Best Local Similarity 100.0%; Pred. Sequence 38 Application US/09370625A

Patent No. 660032

GENERAL INFORMATION:

APPLICANT: Ford, John

APPLICANT: Mulero, Julio

TITLE OF INVENTION: METHODS AND MATERIALS RELATING TO NOVEL CD39-LIKE POLYPEPTIDES

CURRENT APPLICATION NUMBER: US/09/370,625A

CURRENT FILING DATE: 1999-08-09

PRIOR PPLIANG DATE: 1999-07-16

PRIOR APPLICATION NUMBER: 09/350,836

PRIOR APPLICATION NUMBER: 09/350,836

PRIOR APPLICATION NUMBER: 09/373,447

PRIOR APPLICATION NUMBER: 09/273,447

                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   ò

Patent No. US20020138858A1
BERREAL INFORMATION:
APPLICANT: PINSKy.
TITLE OF INVENTION: CD39/ECTO-ADPASE AS A TREATMENT FOR THROMBOTIC AND TITLE OF INVENTION: ISCHEMIC DISORDERS
TITLE REFERENCE: 0575/59167
CURRENT APPLICATION NUMBER: US/09/374,586
CURRENT PILING DATE: 1999-08-13
NUMBER OF SEQ ID NOS: 2
SOFTWARE: Patentin Ver. 2.1

No. is the number of results predicted by chance to have a score greater than or equal to the score of the result being printed, and is derived by analysis of the total score distribution.
                                                                                                                                                                                                                                                                                     1 gcacctacttcaagttctac......tctctcccactccacctaa 1365
